This book is about an emerging new sunny world that is about two years away. Every page conveys a message of hope, joy and prosperity for our future.

Global Finance Reset

This booklet aims to explain the interconnection between the fake Coronavirus pandemic and freezing global economic activity. It is the culmination of thousands of hours of research conducted since 2016. Perspectives aim to inform Americans of their place in this massive global reset. Information should assist residents of all champion nations.

This text aims to reassure readers who are new to the notion of a planned global financial collapse and financial reset.

Part one explains key developments that concern this economic freeze and the so-called Coronavirus 'Pandemic'. The next section briefly outlines dire issues relating to law and order that are transpiring behind the Congress curtain.

The final part speculates the basic shape of our exciting new world. The core premise of this book is that fake news and politicians rarely report the truth. We must decode their thinly-veiled public messages. This volume aims to do just that – reveal truth and empower its beautiful readers.

Checklist

Readers of this book should reflect on these possible scenarios and prepare accordingly.

- A credit freeze may occur soon – no new credit approvals or credit limit extensions.
- Some imported food, medicines and supplies may be scarce such as toilet paper.
- Some residents may be confined to a space such as their county or state.

Core messages

- Events listed above may not affect all American residents in all regions.
- Events above will not last for years – some may occur for days, weeks or monthly only.
- There is no need to panic or become stressed/anxious – a better world awaits.

Modifying wasteful, inefficient or lazy practices are the key to surviving some of these inconveniences. For example, most people can cook a bowl of tomato sauce pasta at home for \$1 a serve. Or they can buy this bowl at a local restaurant for \$7 plus taxes. People who are short of cash may simply need to change their purchasing choices to enjoy a similar living standard. For many, the days of reckless waste and shopping addiction may be over for the short-term.

All discussion in this book is speculative. It aims to draw on relevant data and impartial research to share fair, best 'intelligent' guess inferences. No person or agency could possibly claim to be an expert about the global matters published in this book. Most data about Coronavirus, if such a virus/pandemic exists, is supplied by compromised and corrupt agents and governments.

Petrodollar

A critical source of America's ongoing prosperity is attributed to strong demand for American Dollars (USD) in global exchange markets. The main source of this demand is the Petrodollar. Those who purchase millions/billions of barrels of oil on global markets must pay with the USD. The Petrodollar system seems to be collapsing. This shock may happen next week, next year or after 2021. Recent massive drops in oil prices and oil price trade wars are a key indicator.

MARKETS

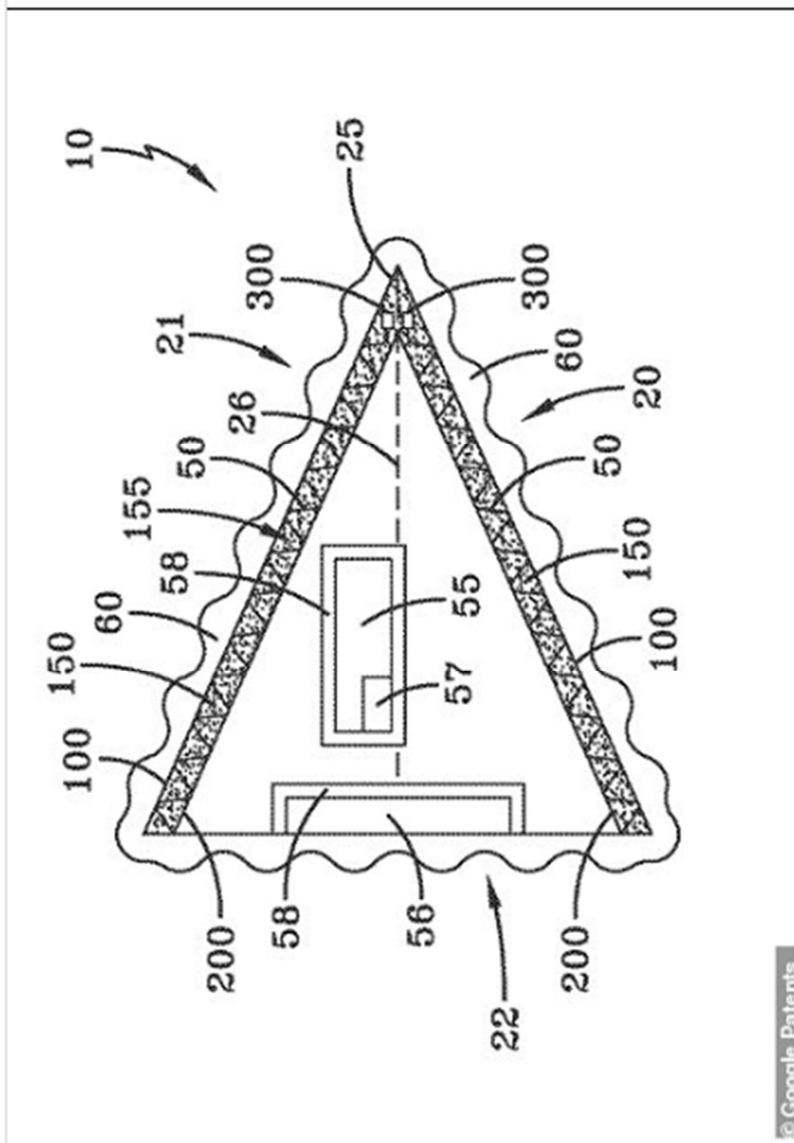

Major players in the energy market (oil, gas) such as Iran and Russia are hostile to America. If the USD collapses by 50%, the cost of your expenses may increase 50%. This finance problem may be worsened by job losses and casual staff being asked to stay home without pay in the short term.

America's *main problem* is that about half of all domestic food consumed is purchased overseas. Virtually all canned fish (apart from salmon) is imported from Asian countries such as China. There is no guarantee that any country will want to sell certain foods to America in the future.

Major food export nations such as Thailand have massive local populations to feed. Some countries will not export food as they don't trust the value of other nations' currencies. Food will be valuable like gold over the next 12 months or so. You can eat food. You cannot eat gold.

Many exciting, positive developments will transpire over the next few years. The example listed on this page is merely one illustration. Many patents and technologies that have been stolen and concealed, by the crumbling ruling class, will be released in forthcoming years. These may include technologies and medicines that manage geriatric illnesses and antigravitational science that enable cheaper, faster travel.

[dailymail.co.uk/sciencetech/article-7194019/U-S-Navy-patents-theoretical-ship-bends-physics](https://www.dailymail.co.uk/sciencetech/article-7194019/U-S-Navy-patents-theoretical-ship-bends-physics)

A patent shows a theoretical spacecraft (pictured above) that proposes altering the laws of physics to achieve unparalleled speeds and maneuverability.

The patent application, titled 'Craft using an inertial mass reduction device' lists Salvatore Cezar Pais, a NAWCAD engineer, as the inventor and describes a mind-blowing technology that 'can engineer the fabric of our reality at the most fundamental level (thus affecting a physical system's inertial and gravitational properties).'

The claims in this *Daily Mail* article are unverified. It is common knowledge that global corporations have selfishly withheld cures to certain diseases as a strategy to maximize profits.

Pandemic

The Coronavirus pandemic is yet another a false flag distraction. Governments and major Non-governmental institutions such as the UN sometimes create fake crises because they think they are doing the right thing for humanity. They fear that the truth will panic the global population.

SCIENCE

latimes.com/science/story/2020-03-05/flu-killed-more-people-coronavirus-covid-19

The flu has killed far more people than coronavirus. So why all the frenzy about COVID-19?

All national governments and the corrupt UN know that the current global financial order is probably going to collapse before 2022. It is mathematically impossible for households and corporations to pay back the hundreds of trillions of dollars that are owed between these entities.

Coronavirus is a fake crisis that is being used to distract the global population from the economic reset. Forty-one deaths in America since December 2019 is not an emergency. Most people accept that a crisis is a pandemic because they heard fake news such as CNN spread this word.

Pandemic simulation exercise spotlights massive preparedness gap

Event 201, hosted by the Johns Hopkins Center for Health Security, envisions a fast-spreading coronavirus with a devastating impact

Katie Pearce / © Nov 6, 2019

Back in 2001, it was a smallpox outbreak, set off by terrorists in U.S. shopping malls. This fall, it was a SARS-like virus, germinating quietly among pig farms in Brazil before spreading to every country in the world.

With each fictional pandemic Johns Hopkins experts have designed, the takeaway lesson is the same: We are nowhere near prepared.

"Once you're in the midst of a severe pandemic, your options are very limited," says Eric Toner, a senior scholar at the Center for Health Security at Johns Hopkins University. "The greatest good can happen with pre-planning."

That center's latest pandemic simulation, Event 201, dropped participants right in the midst of an uncontrolled coronavirus outbreak that was spreading like wildfire out of South America to wreak worldwide havoc. As fictional newscasters from "GNN" narrated, the immune-resistant virus (nicknamed CAPS) was crippling trade and travel, sending the global economy into freefall. Social media

For those participating in New York City on Oct. 18—a heavyweight group of policymakers, business leaders, and health officials—Event 201 was a chance to see how much catch-up work is needed to bolster our disaster response systems. Full videos of the discussion are available online.

Arrests

Mobsters who control (or should I say 'controlled') the global banking financial SWIFT payments system are being neutralized by military operations. Many have been arrested. Numerous seasoned political-economic analysts have long stated that the arrest of money laundering crime boss, Jamie Dimon (JP Morgan Bank) will be the indicator that America's justice system is ready to arrest apex banking executives who siphon trillions of dollars in stolen cash each decade.

During March 2020, Jamie Dimon announced that he was undergoing heart surgery. Furthermore, senior Vice Presidents at JP Morgan were filling his role.

It is likely that the Federal Attorney General is afraid to publicly arrest this known money laundering mafia kingpin as it may panic global investors and collapse Wall Street. The likes of Dimon can negotiate a less humiliating exit, such as a fake medical retirement. As reported by most media outlets, Dimon hints that Davos attendees were infected with Coronavirus.

Multibillionaires who attend Davos promote policies that maim, murder and enslave millions of citizens of multiple nations. Eleventh hour Intervention by a major military power is possible.

As witnessed in recent years, high ranking elites have been arrested for mass crimes that have long been public knowledge among senior executives in justice and law enforcement agencies.

During 2019, these sex trafficking crime bosses have been neutralized: Weinstein, Andrew Saxe-Coburg & Gotha and Epstein. The two right were child sex traffickers and money launderers.

Kip Simpson is an independent video maker. He has meticulously chronicled a record of more than 100 criminals who have been arrested for corruption and other high crimes since after January 2017. These include bank executives, royals, Hollywood celebrities and politicians.

Apex law-abiding world leaders will strategically decide when it is an appropriate time to reveal this information. As at mid-March 2020, food, water, health and housing are core priorities for national governments. Disclosing truth about neutralized camera loving snakes is not a priority.

Many people only believe that news stories are true when Hollywood thespians and lying politicians stand before the camera and tell them what to think. These people are examples of an ever-growing list of public figures who claim to be directly linked to Coronavirus victims.

The Military

Military forces are being deployed globally to control populations re the Coronavirus. These include National Guards and regular (including part-time) forces such as soldiers and marines.

What you make of deployments and orders that affect you and your loved ones is your free choice. This writer can only offer a private opinion about national military orders from the White House. Donald Trump's Presidency campaign was supported by America's patriotic law-abiding Military Executive prior to 2017. His role is to restore law and order and smooth America's unavoidable massive economic transition. Super-elite, untouchable global human sex trafficking mobsters such as Prince Andrew (House of Windsor), Epstein and Weinstein were removed from power by a covert global law and order reset managed by America's Military Institution.

Scams among America's richest, that have been known for decades, are being neutralized.

Understanding the geopolitical context that underpins the Coronavirus (global financial reset) fake pandemic may not come naturally for certain readers who do not follow or care for domestic politics or geopolitics. The information provided in this section is most brief. Two free publications uploaded at www.journalistethics.com offer explicit detail that supports the following three pages. These are the “House of Windsor” and “Declare Independence” books. Those not interested in geopolitics may find it beneficial to skip this speculative mini subsection.

Italy, Iran *et al.*

It is no coincidence that the governments of Italy, Iran and China claim that they are the most affected by the Coronavirus in terms of casualties and fatalities. Italy and Iran are brother nations who report to the same Venetian bloodline crime families. Hence the same flag colors. They are America's arch enemies, alongside China. It is impossible to know true casualty rates in these countries. The number may be zero or a much higher figure at the other extreme of the spectrum.

- The U.S. government has taken unprecedented steps with respect to **travel** in response to the growing public health threat posed by this new coronavirus:
 - Foreign nationals who have been in China or Iran within the past 14 days cannot enter the United States.
 - U.S. citizens, residents, and their immediate family members who have been in China or Iran within the past 14 days can enter the United States, but they are subject to health monitoring and possible quarantine for up to 14 days.

For example, they may provide a window period to search and question foreign agents to ascertain their reasons for entering America.

Around 30,000 American troops were invited by NATO take part in the largest NATO military exercise in 25 years. America has stopped sending troops to the EU due to the Coronavirus (Army, 2020). This press announcement dated March 16 does not say that this exercise is cancelled.

This NATO exercise may have been a cover for the rounding up of mass murdering, warmongering criminals who cause financial chaos. This may include the House of Orange (MH17/MH370 mass murder) and the Rothschild Banking Crime Family, hiding in Switzerland and others. Curiously, the North Arctic was central to this exercise that finished “a week early” (The Hill, 2020).

Arctic exercise cut short: Earlier in the day, Eucom said Norwegian authorities have canceled the rest of a multinational military exercise led by the U.S. military over concerns about the virus.

"After careful consideration and discussion with Allied and partner participants, Norwegian authorities have made the decision to cancel the remainder of Exercise Cold Response 20," Eucom said in a statement. "The decision is a precautionary measure in response to the ongoing outbreak of COVID-19 and to protect the health and safety of all participants and local population." thehill.com/policy/defense/overnights/487133-overnight-defense-more-milit

The exercise, which involves more than 15,000 service members from 10 countries, started March 2 in Norway and was scheduled to wrap up on March 18, but ended a week early.

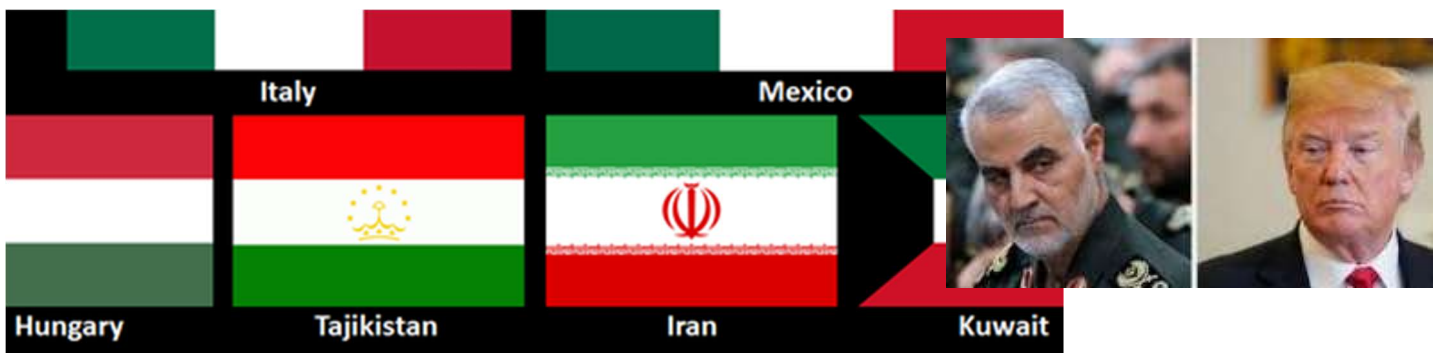

South and North Arctic regions are known homes to high-tech criminal cartel mercenary forces. It is possible that the military are falsely

suggesting that this operation is suspended. Public disinformation during war time is common. Several defense media sources describe this operation as scaling down troop involvement, as opposed to the cancellation of this mission (*e.g.* Army Times, March 16, 2020).

How interesting that these two Red, Green, White brothers report the highest casualty rates.

Sovereignty

JRB Publications (2016)

Order

The Coronavirus ‘pandemic’ – which may be authentic, partially real, or fake, is another force which is restoring the trend towards a return to national sovereignty. BREXIT is a classic example of a state reclaiming its national sovereignty by exiting a centrally controlled dictatorial bloc.

The coronavirus has offered several nations a reason to close or tightly control its borders. Thus far, this mostly concerns incoming traffic. The management of borders by national governments is the antithesis of the open-borders globalist project promoted by One World Government powerbrokers such as Brussels (the European Union) and various United Nations initiatives.

Vaccines

It is likely that a new financial system will be implemented in your country. This system may be entirely global – such as the imploding SWIFT financial system. It may be local or regional. China is likely to implement a digital, cashless, cryptocurrency system. The Yuan is due to collapse.

Imagine this plausible scenario. Your government awards all citizens 1000 units of National Cryptocurrency under the new system. You can only access your account if you provide a high security biosecurity sample to login to the new system. This may be your fingerprint, iris scan or an implanted computer chip. A keyboard login and password are too easy to lose or have stolen. And it is too easy for people to claim multiple 1000 accounts if no unique bio-sample is provided.

This new biological, universal participation system may be implemented to deal with the so-called Coronavirus pandemic. It may be mandatory for you to receive a (fake) Coronavirus vaccine to access the new financial system, and other national schemes such as a disability pension.

What you make of these possible developments is for you to freely work out alone or with your friends and family. Many people harbor deep fears about living in a world where one government computer system monitors their every move by linking their DNA to a central computer.

Emergency economy

During the next six to 24 months, it is likely that some/much of America may revert to an emergency economy. The priorities of individuals, families and other collectives will center around the basics of survival: food, water, medicine, shelter, clothing, family and community.

During forthcoming months, it is possible, if not likely that many currently working people who live urban and metropolitan areas may require assistance with food parcels. It is anyone's guess how this possibility may unfold. Most of America's 330 million residents do not produce any food and they don't collect rainwater.

Yum, yum

If street 'soup kitchens' return to America, and other countries, let's hope that there is no indignity involved for any person who needs to use these life preserving essential services. If you are able, staffing a street food provision service is an excellent idea. You may get fed first. The classic idiom 'ladies first' is a bit out-of-date. However, 'pregnant ladies first' is fair. Please peeps, if you can, always share extra food with pregnant women and those nursing babies. Many children born during the Great Depression did not reach average height. Let's learn from the past.

Reconstruction

Many industries will disappear or shrink, especially in services sectors that do not produce the essentials such as food, water, health and housing. Industries that may shrink at the global level may include tourism, restaurants, financial services and the military. Of course, new opportunities will exist in these industries. For example, America's Space Force may grow.

Many financial advisors and stockbrokers will lose their jobs. The shrinking of the finance sector will flow over into many support jobs in this industry. Examples include administration staff, cleaners and caterers who work in banks. These loss of jobs will inevitably spill over into other sectors that support them, such as conference organizers and the airline industry.

On the other side of the coin, there may be ample opportunities for people to pursue new careers in growth sectors such as farming, energy and housing. People who transition from a job that involves sitting in a chair in front of a computer for

40 hours a week may find that their new outdoor farming or construction career provides them with exercise, fresh air and much joy! Many city families may transition into small farm lifestyles.

Golden age

Usury

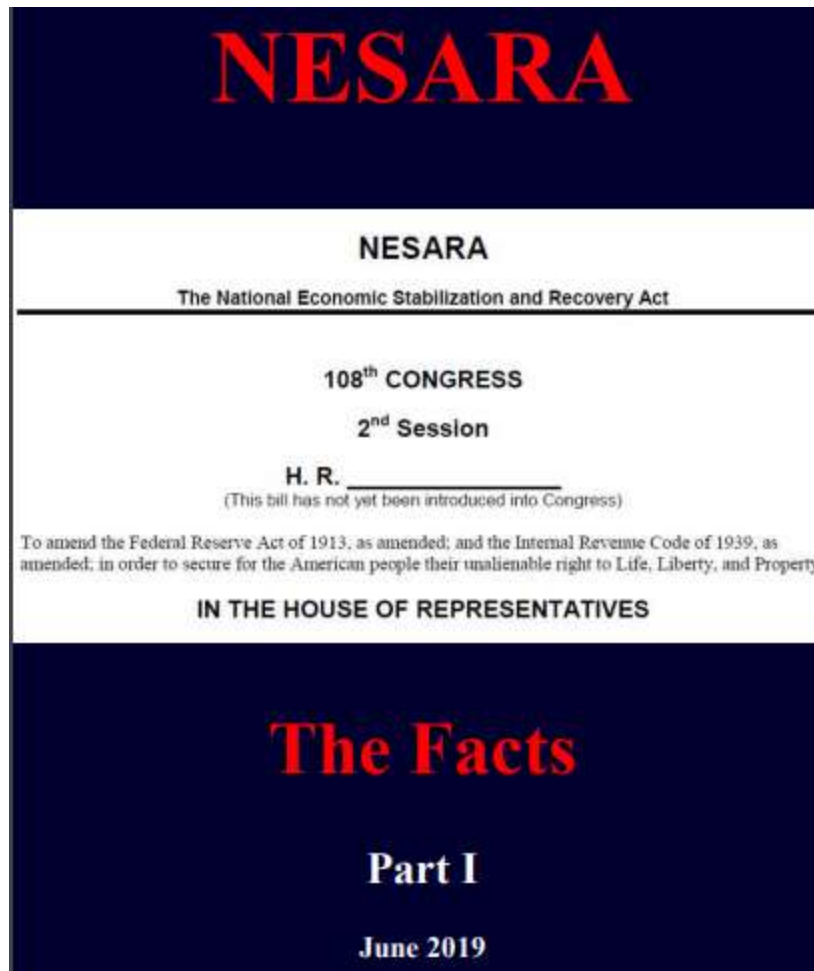

The controlled demolition of the Vatican-Rothschild Bank for International Settlements SWIFT slave scam will usher in a new global system. As an outsider, it is impossible to know what this system will look like. Its form is likely a moving target among planners. In the crudest sense, from America's perspective, the new system will mirror one of these partially overlapping structures.

1. America may have a mostly/fully closed, protected economy and its own finance system.
2. The world may morph into an East–West bipolar order.
3. A new fully integrated, single global financial system may emerge.

Under system number 2., above, China may lead the Eastern pole and America may spearhead the Western side. These systems are not mutually exclusive. For example, America's economy may be driven by transactions that mostly use an American finance system, and partially process international transactions. America and other countries may administer three lawful currencies. For example, this may include a Domestic Dollar (DUSD), Global US Dollar (GUSD) and an American Cryptocurrency (CUSD). This system may be a mix of paper and digital currencies.

The free, open-access book overleaf is about an act that may have been covertly passed by America's Congress two decades ago. The Bill in this text's Annex is about a financial system that outlaws interest charges. Financial administrators may earn income by charging fixed fees at the commencement of the contract only. The so-called NESARA Bill/Act is not a publicly proven fact.

There is evidence that Donald Trump aims to transition America towards an economy that partially resembles the *NESARA Bill*. During March 2020, Donald Trump stated that he plans to set payroll tax at zero percent for the remainder of 2020. This policy may effectively neutralize or diminish the role and power of America's Internal Revenue Service.

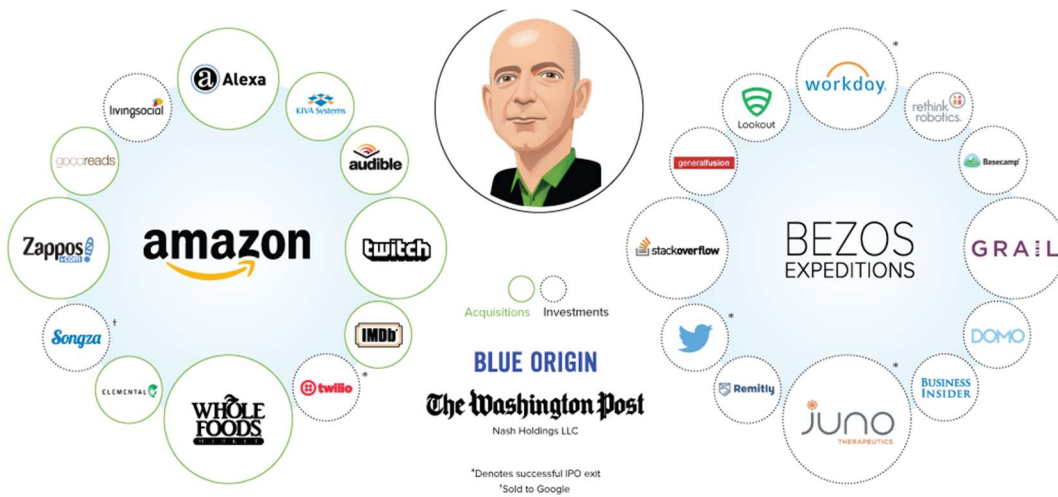

Self-sustaining

This is the good news page. America is one of a handful of nations that has the means to achieve full security in all critical areas: food, water, energy, medical, housing and defense. Immediate housing security exists if people adapt. For example, a small percentage (*circa* 10%) of homes that have an empty bedroom, basement or utility room may rent out these rooms for extra income. This may part fix most of America's homeless problems.

Please help others in need, where you can, such as youth, the elderly and those with a disability who live alone.

Amazingness

Under the SWIFT, perpetual debt financial system, around 99.9% of Americans will be debt slaves by 2030. America's wealth

would be owned by a few dozens corporate controllers who report to Rome, Royals, Rockefellers and Rothschilds. The net worth of the world's richest thespian puppet Jeff Bezos is about USD160

billion. This MK Ultra zombie criminal flagrantly flouts minimum wage laws, despite his insane wealth.

Under the current order, America was destined to have one wicked corporation that paid slaves a few dollars an hour. The wealth of these criminal corporations will be confiscated. The economy and society may be bumpy for a year or so as we transition into a sustainable economy that promotes small business prosperity. Looking at the big picture, this rocky period will be
